\$2.00 per Year. 5 cents a copy

## Fine Exhibition Of Livestock At Fair

For the second year in succession the Didsbury and Carstairs stockmen have shown that it is possible to hold an excellent fair when money prizes are not a consideration.

There were about 100 entries in horses and about 80 cattle were brought into the show ring, which kept the judges busy until late in the afternoon. Entries in swine and sheep classes were not as large as in former years.

In the exhibition building the number of exhibits was somewhat disappointing. There was a lack of competition in all sections. To Mrs. Kercher went the honor of being the largest exhibitor.

The sports were more attractive than has been the case for several years and some good horse races were enjoyed. The half-mile 14.2 and under pony race was won by Fulkert, with Johnston second and Frach third. The half-mile open was won by Fulkert's "Miss George," Graham's "Tony" second and Fulkert's "Lady York" third. Three heats were run in the mile harness race, McBean winning over Sinclair in each heat.

A feature of the afternoon was the exhibition of jumping by Fulkert's pony, "Peggy." Ridden by Glen Fulkert she made three beautiful jumps, each one higher than the last, the highest being 5-ft-6-in.

The band organized from the Didsbury and Carstairs district added much to the afternoon's entertainment and elicited many favorable comments.

Didsbury Canaries won the soft-ball tournament, beating Melvin in the finals.

## Land Changes Hands.

The Ray Lantz quarter section changed hands last week, the buyer being Mrs. M. Roberts, who recently came from England. Mr. Lantz retains this year's crop, but the new owner will take possession September 1st.

C. E. Reiber, the local real estate agent put through the deal.

Mr. Roy Warren, 10 miles northwest of town, sold his farm to Mr. Olson, of Calgary. The stock and equipment also was part of the deal.

We understand that Mr. Warren acquired some house property in Calgary in the transaction. Mr. Olson has already taken possession.

We are informed that one or two other deals are being put through, and according to an advertisement in another column, other buyers are looking for places.

## Summer Vacation School.

To the boys and girls of Didsbury! Beginning on Monday next, August 7th and continuing until Friday, August 18th, a summer vacation school will be held in the Knox United Church each morning except Saturday, from 9.15 to 11.45.

Do you like games? Are you fond of stories and songs? Do you like to make things? Of course you do, then come and bring your friends and have the best time you've had this summer.

All boys and girls of ages 4 to 14, and from whatever church or no nomination, are heartily welcome. Remember the dates—August 7th to August 18th.

## LOCAL & GENERAL

Miss Alice Pearson is visiting with Miss Ida Reglin at Pigeon Lake this week.

Mrs. W. H. Moser, of Hillcrest, is spending a few days at the home of her brother, Mr. J. W. Halton.

Mr. H. Lynch-Staunton, who has been vacationing at his home at Pincher Creek, returned to Didsbury on Monday.

Mrs. W. G. Evans and sons, who have been vacationing at Sylvan Lake for the past month, returned home Sunday.

Mrs. W. A. Austin and Mrs. W. D. Spence are spending a month's vacation at the Studer cottage at Sylvan Lake.

Mr. and Mrs. Harold Clemens, of Edmonton are vacationing here, the guests of Mr. and Mrs. M. B. Clemens.

Mr. H. J. Tuggle, of Los Angeles, and an oldtimer of this district, is visiting with his sons here for a few weeks.

Mr. and Mrs. Cecil Studer, who have been visiting here and at Sylvan Lake, returned to their home at Lethbridge on Sunday.

Mr. and Mrs. W. McFarquhar returned from their honeymoon on Tuesday. They are taking up their residence in the Bank of Montreal Apartments.

Misses Mollie Pearson and Irene Bellamy, who were camping at Sylvan Lake, returned home Sunday. They say that camping in a flooded tent isn't very pleasant.

Mr. and Mrs. McGhee returned from the coast Sunday. Mr. McGhee will resume his duties at the depot on Thursday and Mr. Pete Miquelon will relieve at Carstairs for about three weeks.

The town of Innisfail has reduced its mill rate 3 mills. The rate for general purposes is 18 mills; school 20 mills; hospital 3 mills. A total of 41 mills, as compared with 44 mills last year.

Mr. and Mrs. H. Hawkes returned Sunday from their vacation spent in the Edmonton district. When asked if he saw the big hailstorm, Mr. Hawkes says he saw hailstones as big as baseballs, but he just beat the storm into Edmonton. Hailstones were pounding on the rear bumpers of his car, but didn't hit the top. Some driving!

## To Equalize Payments To Pool Members

Equalization of payments among Wheat Pool members who did not receive 60 cents a bushel on their 1928 grain, will probably be made this year, according to an announcement made by Premier J. E. Brownlee in addressing a meeting at Lethbridge on Monday night. He said that he expected John F. McFarlane, head of the combined pools, had realized sufficient money to equalize these payments among pool members.

Premier Brownlee is making a tour of his riding, as he does annually.

## Wins Championship For Ayrshire Cow

Mr. Henry Hanson, who lives southeast of town, was winner of the Joseph Stanley Trophy donated to the Ayrshire Club of Southern Alberta for the highest production record for mature Ayrshire cows in the province.

The cow, "Glenwillow Barbara," No. 12157, had a production record of 11,610-lbs milk and 457-lbs butterfat in 305 days.

The cup will be on exhibition at the Crystal Dairy for the next few days.

## WEDDING

### HALL—SWALM

A pretty wedding took place at the bride's home, Didsbury, on Thursday, July 27th, 1933, at 11 a.m., when Miss Frances Elizabeth Swalm became the bride of Mr. William Robert Hall.

The home was tastefully decorated with sweetpeas and other flowers. The ceremony, performed by the Rev. V. K. Snyder, was solemnized under a pretty arch, the bridal party taking its place to the strains of the Wedding March, played by Miss Ruby Traub.

The bride, who was given in marriage by her brother, Mr. Noah Swalm, wore a lovely gown of white tulle, and carried a bouquet of mauve and white sweetpeas. During the signing of the register a piano solo was rendered by Miss Lila Swalm, niece of the bride.

Following the ceremony a dainty buffet-luncheon was served to about twenty guests. The bride couple then left by train on an extended wedding trip, the bride travelling in a becoming costume of grey and blue with accessories to match.

Mr. and Mrs. Hall expect to spend a short time at the Century of Progress Exhibition at Chicago, also stopping at several places enroute to visit friends, thence to Kitchener, Ont. to visit the groom's mother. Upon their return they will reside in Didsbury.

## Canadian Legion Will Hold Memorial Service

The local branch of the Canadian Legion, B.C.S.L. will hold its annual memorial service at the Butte on Sunday afternoon, August 13th, the first anniversary of the unveiling of the memorial erected by the Legion in honor of their fallen comrades.

The members of the Legion and other returned men will parade at the hall, and headed by the band of the Canadian Army Service Corps, Calgary, (by kind permission of Lt.-Col. P. H. Shields) will march to the Butte.

The laying of flowers by the Legion and their friends will be observed, and the memorial service will be conducted by the chaplain, Rev. A. J. Mitchell.

Invitations are extended to all ex-servicemen in the district to join in the parade, and to the general public to join in the service.

## Gasoline Truck Burns.

A loaded gasoline truck owned by the Emerald Gasoline Co., caught fire three miles south of town about 3 o'clock last Friday morning. A party of motorists reported the matter to Constable Kercher, who, accompanied by Mr. E. Ford, drove to the scene of the fire. They found the driver in a dazed condition in an adjoining field.

It appears that the fire started at the engine of the truck and on seeing the fire the driver jumped and the truck ran into the ditch and was completely destroyed.

The wreck was purchased by Meek Bros. and taken to Olds on Friday evening.

## H. W. Morgan Again President of Alberta Postmasters' Asscn.

H. W. Morgan, of Didsbury, was unanimously returned to his office as president of the Alberta Postmasters' Association, when election of officers was held at Thursday's session of the association's convention in the Macdonald Hotel at Edmonton.

Other officers were also re-elected. They are: G. T. S. Paterson, Okotoks, vice-president; W. H. Jack, Clyde, secretary-treasurer; T. Edis, Red Deer and A. Foulds, Delburne, members of the executive.

Lethbridge was chosen as the place of meeting for the 1934 convention.

## KNOX UNITED CHURCH NOTES

Services will be resumed at Knox United Church on Sunday, August 6th at 7.30 p.m., when the minister will take as his subject, "The Suffering of God's Grace for Human Need."

## The World's Grain Show.

From the beginning of time man's chief concern has been the obtaining of food to sustain life, and particularly that item of food which we have come to term the staff of life, bread. All down through the ages man has grown grains which, at first, by means of the crudest of methods he crushed and converted in a kind of flour. In the early years of the world's history wheat was recognized as the most acceptable of all grains for flour making purposes, the most highly prized of all grains. For thousands of years wheat has been a vitally important factor in the life of the human race; if there was a lack of it famine faced the people. This back in the days of Joseph the first storage elevators were built in order, in years of plenty, to provide for the lean years which always have come and always will come.

The growing, storage, transportation of wheat was a problem in those far off days, and it is one of the world's greatest problems today after the passage of thousands of years. It is engaging the attention of the statesmen of the world assembled at the World Economic Conference in London, England; it is the reason for the World's Grain Exhibition and Conference which opens at Regina on July 24. Rise and fall in the world supply and world prices of wheat is one of the great trade barometers of the world. Prices of other commodities fluctuate as the price of wheat fluctuates.

Therefore, the World's Grain Exhibition and Conference at Regina is an event of outstanding importance, and of particular importance to Canada as one of the great wheat producing and exporting nations. It is not a Regina exhibition, nor a Saskatchewan exhibition, nor a Canadian exhibition, but a world exhibition in every sense. But of all sections of the globe none is more vitally interested in its success than the prairie provinces of Canada, in the very heart of which it is being held, and held at what may be regarded as a crisis in the history of the world's oldest and most important industry.

Years of planning and organization effort have been devoted to making this World's Grain Exhibition and Conference a notable event. As a result, it will undoubtedly prove to be one of the greatest world exhibitions devoted to a single phase of human endeavour ever held. While wheat will occupy the foremost place because, as already stated, it is the foremost grain in the economic life of the world, every known variety of grain will be on exhibition and in competition. Many tons of exhibits from a score or more of nations and from all continents, including comprehensive and representative national exhibits as well as the competitive exhibits, will be attractively displayed in the largest grain exhibition building in the world, built specially for this great show. This building contains several acres of floor space, and actually miles of frontage of exhibits.

This building in itself alone will repay a visit to this world exhibition. The scheme of decoration is unique. The interior of the huge structure is completely decorated in grains and grasses and seeds of every kind, description and color. It will be a veritable bazaar of light and color, with huge colored transparencies, the largest in the world, specially constructed in England, and interesting devices too numerous to enumerate.

Apart from the exhibition proper, the conferences to be held on every important subject related to grain growing, financing, storage and transportation, and participated in by the leading experts and agricultural officials of governments the world over, will be of such a high educative value that people as deeply interested as Western Canadian farmers are, cannot afford to miss them. Such subjects as Present World Situation and Trends, World's Wheat Surplus, Retarding and Controlling Production, Financing World's Wheat Surplus, World's Import Cereal Requirements, World's Wheat Import Standards, Merchandising Methods in Grain Marketing, Can Improvements Be Expected? Greater Economy in Transportation and Storage of World Export Grains, Livestock—Its Place in Marketing Grain, and many others, will be discussed by men who are familiar with their subjects and who can speak authoritatively on them.

Morning sessions of this great world conference will be held in the Armories located in the exhibition grounds, a beautiful building capable of seating 4,000 people comfortably. Afternoon sessions will take the form of joint meetings of various technical societies and groups, and will be held in Regina College and adjoining buildings.

As an exhibition city, the capital of Saskatchewan will be looking its best as the citizens are vying one with another, as well as working untidily through various civic bodies, to beautify and decorate the city for this memorable occasion.

And there will be ample accommodation for all who may come. In addition to a "tent city" of 2,000 tents, with all sanitary conveniences, created adjacent to the exhibition grounds, thousands of city homes are being thrown open to exhibition guests and visitors, every room has been inspected, classified, rated and listed, so that people will know just what they can obtain and where and at what price.

Inasmuch as this World's Grain Exhibition is being held in conjunction with the annual Saskatchewan Provincial Fair, which has been greatly enlarged this year, and all within the same grounds, visitors will enjoy the advantages not only of the World Show but of the Provincial Fair as well, with all the varied attractions and amusements it will have to offer.

Western Canadians wishing to see a World's Exhibition have in the past always had to travel long distances and go to great expense to enjoy such a privilege. This year a World's Exhibition, and one in a class by itself will be in progress right in their midst. It is an opportunity that comes but once in a lifetime, and every person resident in the three prairie provinces who can possibly do so should take full advantage of it.

## Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Mailed and only by The T. Millburn Co., Limited, Toronto, Ont.

## Wheat In Two Countries

United States May Have To Import From Canada This Year

If the crop experts are correct in their predictions the United States will have to import wheat before the 1934 crop is harvested—and Canada has wheat for sale.

United States Government reports estimate total production for the present year at 603,000,000 bushels. Normal consumption is 620,000,000 bushels, and usually there are heavy exports, shipments to territories and insular possessions. Winter wheat is down 250,000,000 bushels from the average and spring wheat is "below normal."

At the same time, Canadian Government officials report that in Saskatchewan and Manitoba crop prospects were "notably better" than a year ago, and in Alberta only very slightly below the corresponding date of '32.

On the basis, then, of present expectation, the United States will be off the export market at the next year, and in addition will have to import a considerable quantity of wheat. This situation should react to the distinct advantage of Canada, which goes into the new crop year with a heavy carry-over and the best outlook it has probably for a year or two—well-distributed production. Dollar wheat may not be so far away as it has seemed—Ottawa Journal.

## Concord Farmers Like Crows

Believe He Is Friend and Pays For

Uncle Sam's experts and states of Massachusetts and Maryland may be again 'em, but New Hampshire is a friend of the crow.

The farmers of the Old Granite state will have none of the new-fangled coal tar solutions for soaking seed corn and peas just to give Jim Crow the collyriolous.

They believe the crow is a friend of the farmer. He may steal a few kernels of planted corn, but most of the time when he is scratching in a field, he is probably digging for bugs, farmers here claim.

The damage they do is exaggerated, at least Commissioner of Agriculture Andrew L. Felker believes it is.

"Generally speaking, New Hampshire farmers aren't upset much over crows," he said. "We'll hear 'em cawing for many a springtime yet, and when last year's overalls are beyond all patching, we'll stuff them with straw, put a sugar bag head on top and have us a scarecrow for old time's sake."

"They pay for their keep by the insects they eat."

## Influence Of Women

Things Conditions Would Be Much Better If World Was Guided By Women

"There is one thing of which I am absolutely positive," said C. P. Howard, Indianapolis, in addressing the annual banquet of the Ontario and Quebec Conference of Typographical unions, at Toronto. "If women controlled the unions and politics of the world we wouldn't have millions unemployed, nor would we have hundreds of thousands starving while we have plenty to eat."

The influence of women, he said, "has kept men from being worse animals than they are."

President Franklin Roosevelt, he said, was the greatest dictator the world had ever seen. "You may take Stalin of Russia, Hitler of Germany, or Mussolini of Italy—none of these has the power of the president of the United States."

## T.B. Infection

New Substance Reported Being Made To Detect Presence Of Tuberculosis

Research workers of the National Tuberculosis Association are perfecting and will shortly give the world a new substance to determine accurately the presence of tuberculosis infection in man, the Toronto Telegram said it has learned.

"This substance, it is understood, will contain no foreign elements other than the one the purpose of which is to indicate diagnostically the presence of infection," the newspaper said. "It has as yet been given no name and is not ready for commercial distribution."

## New Clock Very Accurate

Master Timepiece Will Not Vary Second In Five Years

A master clock that will not gain or lose one second in five or six years, was described before the 219th meeting of the Physics Club of New York by G. H. Caldwell, former Federal Radio Commissioner. The clock was completed recently in Washington by engineers of the United States Government and will be installed at the Naval Observatory there to regulate all official clocks and correlate over government radio stations. In short, the new timepiece will set the pace for all activities ashore and afloat.

The clock operates on a unique principle. A slender bar of crystal quartz a few inches long is suspended in a air chamber, in which the temperature is kept constant to within a few hundredths of a degree. The arrangements of the quartz bar in the chamber is such that air vibrations react on it to produce what is called "acoustic feedback." The bar of quartz is delicately suspended on slender threads. An accuracy of one part in 100,000,000 is claimed.

"Clocks operated by other means are not nearly of such accuracy," said Mr. Caldwell. "Even the best pendulum timepieces have a daily error. They run fast and slow, in accordance with the attraction of the moon's mass. But the electronic clock, employing crystal, goes serenely on beating time, undisturbed by the effect of moon on earth. A clock employing such a principle is the most accurate known."

## Foresight Of British Soldier

Made Possible Rapid Mobilization Of Army For Great War

A hundred years ago was born near Dublin, Ireland, Garnet Woiseley, a British soldier, whose chief title to fame was that he reorganized the army, modernized its system of training, prepared it for the emergency of war and made rapid mobilization possible. But for his persistency there would have been no expeditionary force—incomparable for France, Italy and Germany—called to rush to France in August, 1914. The small but well-trained British Army rendered a great service by its fighting retreat from Mons; and at the first battle of the Marne, the report of its advance into the gap between the First and Second German Armies confused the tactics of the enemy, which believed that the British ranks had been broken and could not be reformed—New York Times.

## Prepare For Immigration

Look For Resumption Of Immigration From United Kingdom

Satisfied the provincial governments of Canada will shortly desire the resumption of immigration from the United Kingdom to Canada, Brig-General M. L. Hornby, of Leithridge, Alberta, announced his intention of sailing to England to lay proposed immigration plans before United Kingdom authorities.

"I wish to make it quite clear that I am not advocating increased immigration before the provincial governments have come to consider this advisable," said General Hornby in an interview in Montreal. "What I am advocating at the present time is that we should formulate a definite plan of action without any loss of time. For instance, there should be the acquisition of suitable land and the preparation of suitable farm homes."

## Evolution Of Electric Lamps

New Type Is Very Different From Old Style Tungsten

Edison's tungsten electric lamp was one of the marvels of the 1893 Chicago World's Fair. A new type of electric lamp, the sodium-vapor bulb, promises to be the most significant scientific device on exhibit at the Century of Progress Fair, 40 years later. A Dutch sodium-vapor bulb exhibited at a New York scientific meeting last night has 10 times the visibility of ordinary tungsten lamps and provides from three to four times as much light for the same amount of electricity. The new lamp provides an unusual yellow light, said to be helpful to vision.

Motor roads in the world now total 6,665,800 miles.

## Planning Unusual Flight

Cobham May Attempt Great Refueling Trip To Australia

Famous Sir Alan Cobham and Squadron Leader Helmore are proceeding methodically with the flying trials of a new single-engine monoplane in which later this year they proposed to fly 10,000 miles non-stop, probably to Australia. They plan to have the 'plane refueled in flight from 'tanker' aircraft which will come to meet it from five or six aerodromes along the way. Thus the need to carry an enormous load of fuel at the start is avoided.

For ordinary commercial use the airplane is intended to carry pilot, four or five passengers and luggage. Equipped for the proposed long distance flight it will have seats for the two pilots only, the remainder of the space being occupied by approximately 230 gallons of fuel, sufficient for about 20 hours' cruising at 130 to 140 miles per hour. Power is derived from a single 245 horsepower Armstrong Siddeley "Lynx" air-cooled engine. A Townsend ring-around the engine is responsible for a gain of 15 miles per hour over the speed attained with an uncwined engine.

If Cobham and Helmore make for Australia and have good luck, they should reach the Australian mainland from England in less than four days.

## Increase In Exports

Shipments To United Kingdom Show Heavy Increase During Past Year

An increase of nearly 300,000,000 in the exports of Canada to the United Kingdom for the 12-month period ended May 31, 1933, is shown in the leading commodities as compared with the same period of 1932, according to a statement issued by Hon. H. H. Stevens, Minister of Trade and Commerce, recently. For the year ended a month ago total exports of leading commodities to Great Britain had a value of \$108,076,782, while for the corresponding period a year ago the value of these was \$78,950,244.

The largest increase in value was wheat, which, at \$65,744,808 this year, was more than \$25,000,000 greater than last year.

The value of bacon exports increased from \$1,013,029 to \$2,855,028; of barley from \$1,407,069 to \$2,810,845; of hams from \$1,674,014 to \$2,278,862.

An increase of nearly \$1,000,000 was shown in timber exports.

## Great Boon To Outfitters

Nazi Brown Is Color Of Hour In Germany

Brown is all the rage today in Germany for everything from suits to shoes.

The triumph of the Nazi "brown shirts" has given men's outfitters an undreamed-of opportunity. Everywhere they are displaying cloth and leather goods of the color of the hour, coupled with printed exhortations to all good Germans to fall in line.

"Browns are trump!" advertises one enterprising shoe store on Berlin's busy Friedrichstrasse. His window display does not contain even one pair of black footwear.

## IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire-cuts or saddle boils, or cows have caked udders, the thing to do is get the Minard's bottle at once, as Mr. David of Glasgow, Manitoba, knows, he writes: "I like your Minard's Liniment. Like to have it in the house. I have found your liniment is displacing cloth and leather goods of the color of the hour, coupled with printed exhortations to all good Germans to fall in line. A family doctor prepared Minard's Liniment about 80 years ago. It is available in every stable and every house."

## Says Capitalist Nations Should Pool All Scientific Knowledge To Meet Soviet Trade Challenge

Warning that capitalistic nations must pool all scientific knowledge and trade secrets to meet the "challenge of Soviet Russia's industrial system and end unemployment" was voiced before the American Association for the Advancement of Science.

Only by this means could the nations that now are in the lead industrially maintain this lead, said Dr. A. P. M. Fleming, engineer of the Metropolitan-Vickers Electrical Company of England, one of the 30 foreign scientists invited to speak before the summer meeting of the association.

"There is in the U.S.S.R.," he said, "a larger body of organized research workers under unified control than exists in any other individual country in the world. The Soviet government looks to science to play a most important part in its industrial and economic activities."

"Whether the Soviet plans succeed or fail, already enough has been accomplished to show the possibilities of this combined scientific effort. Even partial success may have far-reaching effects on the rest of the industrial world."

"This situation is developing at a time when there is little industrial co-operation between the other countries and there is no doubt that this challenge of a communal to a competitive plan justifies a careful consideration of the advantages of further co-operation especially in the matter of pooling of scientific resources and experience."

"With the lead that the foreign manufacturing countries jointly possess and with the fullest use being made of their joint scientific resources, it should be possible to meet the challenge successfully."

### Navigates Her Own Craft

Twenty-One-Year-Old Nova Scotia Girl Has Master's Papers

Nova Scotia has almost as many sea captains as Kentucky has colts, with the difference that the Bluegrass sailors have a better right to their titles because of experience, ability and valor. But one captain among them stands unique because she is a woman.

Captain Mildred I. Wamboldt, 21-year-old native of Lunenburg, is probably the only female in Nova Scotia who not only owns, but holds master's papers and actually navigates her vessel. And the craft is no toy yacht. It is the 432 gross ton schooner E. P. Theriault.

"Why, I don't think I could live if I had to stay ashore," the pretty young sailor declared.

Born of a long line of sea-faring forefathers, she boasts that she hasn't been six months ashore in the past nine years. Bred to the sea, she made many trips with her foster-father, Angus Publicover, Staten Island, N.Y., formerly of Lunenburg. Then she made a special study of navigation.

Now her schooner is registered in her name. As master, she signs the clearance papers, transacts all the business of the craft, and rules with a firm hand her crew of one Nova Scotian and eight natives of Barbados. Her foster-parent accompanies her on her voyages, but only as mate. She trusts the schooner to no one but herself.

Captain Mildred is no fair-weather sailor. Last February she sailed from Lunenburg with salt for New York, but when 230 miles from destination, the craft was caught in a terrific gale. The vessel was forced to turn and run before the wind. Her sails were stripped from her and her gear damaged. By the time the hurricane had blown itself out, the E. P. Theriault had been blown within 150 miles of Barbados. The young captain put into the islands, and sold her cargo there.

She makes Barbados from Lunenburg in 16 days, and from Bridgewater in 17 and 18 days, on different voyages. She made a trip from Bridgewater to Lunenburg in 13 days, all considered very good time.

The E. P. Theriault, built on the Fundy shore, is now registered at Bridgewater, Barbados.

### Where Men Excel

Better Than Women At Guessing What Children Like

Men are more adept at selecting amusements for children than are women, says Florence Bamberger, one of the two women professors at Johns Hopkins University. Men know better what children like; women know better what is good for them, she contends.

Miss Bamberger bases her belief on an experiment she conducted in compiling information for a volume on the art of decorating children's books. In this, she discovered men were able to select subjects that appealed more to children than were women. The reason for men's ability along this line, she thinks, comes from the fact that the time they spend with the children is largely in play. Women are occupied with the technical aspects of rearing children.

### Chemical Changes In Liquids

Scientists Find High Pitched Sounds Will Kill Bacteria

If the baby could cry at a higher pitch he might help make his own milk more digestible.

A study of the effect of sounds in causing chemical changes in milk was reported to the American Association for the Advancement of Science by Dr. E. W. Fiesdorf and L. A. Chambers of the University of Pennsylvania Medical School.

Scientists have recently learned that bacteria in milk, water, fruit juices and other liquids can be killed by "super sounds" of very high pitch.

### Not In His Line

Paddy, who was eager to obtain work went to the employment exchange.

"Anything this morning?" he asked the clerk.

"Yes," said the clerk, after consulting his books, "there's a job at the Eagle Laundry. Do you want it?"

Paddy shifted uneasily from one foot to another.

"Well," he said, "it's like this, I really want work mighty hard, but the fact is I ain't never washed an eagle."

### Wore Large Shoes

Chief attractions of the state museum in Missouri's state house at Jefferson City are a pair of shoes, size 22, once worn by Miss Ella Ewing. She was a native Missourian, who died several years ago, and was 8 feet 4 inches tall. She was supposed to be the "largest woman in the world" during her life.

By Ruth Rogers

TAKE OFF YOUR COAT! JUST AS YOU PLEASE!

It's smart as can be either way. As everyone knows Dame Fashion is very fond of capes for spring.

And here's a dashing model that is very versatile. Take off the cape and you have another dress.

Dawn blue crinkly crepe silk carried out this fascinating model.

Style No. 712 is designed in sizes 14, 16, 18, 20 years, 22 and 24 inches bust.

Size 16 requires 4 yards 38-inches, with 1/2 yard 36-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Prince Of Wales Expresses Confidence In Canada's Ability To Emerge From Depression

### Very Easy To Obtain

Newspaper Claims Untraceable Poisons Sold Freely In England

Two drugs capable of killing a man without trace are on sale at large chemists throughout the country, says a London newspaper.

They are supplied without question to any person who demands them. One of them bears no "poison" mark on its bottle.

Neither of them can be detected after death.

Many poisonous substances are obtainable from all chemists, but these two are remarkable for the ease with which they are bought, for the impossibility of tracing them once they have been administered, and for the fact that they produce symptoms similar to those due to natural diseases.

The pathologist of a famous London hospital, questioned by a newspaper representative about one of these substances, said "If ever I am wished to commit murder, this is what I should choose."

It is a protein-like compound, in daily use for the treatment of a common disease. It is supplied as a liquid in tubes which bear no poison mark. A child can buy it anywhere.

And yet the injection of the contents of a two-shilling tube induces coma followed by death in from four to six hours.

It is impossible to analyse, and it leaves no trace in the body after death.

A newspaper representative visited a chemist's shop near Oxford Street, and for two shillings he received a tube containing more than a fatal dose of the liquid.

The second deadly poison is a liquid made from the seeds of an Indian tree. The medical dose is one drop, and an overdose results in an exceedingly painful death.

Two grams are enough to produce fatal results.

It, too, is impossible to detect after death.

At the same shop, two grams of the poison were bought for 1s. 6d. For this it was necessary to sign a receipt, but no steps were taken to verify the name and address given, and it was asked to what use the drug was to be put.

### Little Things That Count

Things that help one to sweeten and light: Visit of your neighbor's hens to your garden; the hiding in your favorite tulip bed of a bone by a vagrant dog; the early rising neighbor who plays a lively tune on his lawn mower just as you are getting off to your morning's sleep.

The Prince of Wales told 700 guests at a Dominion Day dinner he was confident of Canada's ability to emerge from the economic depression and proceed to a bright future.

Standing beside Prime Minister R. B. Bennett, of Canada, and addressing an audience including representatives of every phase of empire life, the prince said, "I know Canada better than any other part of the empire. I am really quite ashamed to think six years have elapsed since I have been to my ranch in Alberta; not that my residence at High River or any effort on my part could alter the price of cattle or vary the exchanges."

"Canada," he continued, "is suffering with the rest of the world. I am proud of my association with her, and am confident, as her citizens are confident, of her recuperative powers and a bright future."

The Prince dealt briefly with the struggling world economic conference and last year's Ottawa economic conference which brought together representatives of all the empire nations.

"We all know," he said, "are fixed just now on the economic conference, but our mind naturally goes back to a year ago, the eve of the Ottawa conference."

"Quite apart from the discussions and agreements then made, that gathering about the world that here is a great national unit able by the very nature of its composition to meet in union but without any trace of that obstacle to progress, and that evil of present-day, individual nationalism."

"We all know," he said, "that the work of the economic conference would be beset with very great difficulties, but we must be confident for the sake of the world."

"Not the least impressive feature (of the world conference)" he declared, "is participation in representation of various parts of the great British Commonwealth of nations." These nations of the commonwealth, he said, come with best wishes to the "great task of helping put the world on the road to economic and financial recovery."

### Selling Big Japanese Coin

Largest Gold One In World Weighs Nearly Four Ounces

The Japanese One, the largest gold coin in the world, is to be sold at London, England.

Stamped with the seals of the government mint, the Japanese One is a large oval plate of gold measuring five inches across, and weighs nearly four ounces.

The coin was signed in Japanese ink by the superintendent of the mint as a guarantee of its purity. The signature was considered the most important part of the coin, and if it was rubbed off the plate ceased to be current money.

### U.S. Population Increases

The population of the United States has increased 2,017,054 since April 1, 1930, to a new high of 125,093,000. So declared the census bureau in presenting some complicated additions, subtractions and divisions arrived at by estimating the increase since the 1920 census on the basis of the available data regarding births, deaths, immigration and emigration.

### Had Long Wait

When Peggy returned from her first day at school she was asked by her mother if she enjoyed it.

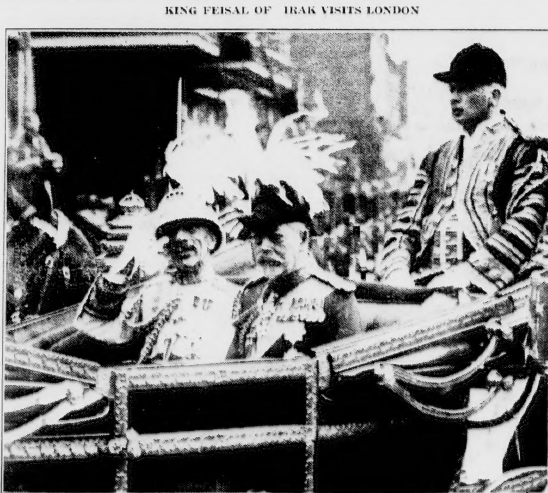

"I like it all right," said Peggy, "but I didn't get any present."

"What made you think that you would get a present, dear?"

"Teacher said, 'Sit there for the present,' and I sat there all morning and never got one."

### Brazil's Surplus Coffee

Brazil this year will have the biggest crop of coffee in history, millions more bags than the whole world uses. It looks as if that country will have to continue its bonfires, having already burned more than 15,000,000 sacks.

Here we see His Majesty King George leaving Victoria Station with King Feisal of Iraq on their way to Buckingham Palace where the Arabian monarch is to stay for a few days. King Feisal is acknowledging an enthusiastic reception by the people of London.

### Note of Optimism.

Canadian minds were so conservative during the depression that frequently their reports sounded like gospels of gloom. Accordingly, one must be encouraged by the note of optimism that has crept into their recent business communications. Take this from the Royal Bank's current letter:

"With a rise in the prices of agricultural and mineral products, increased carloadings, a more than seasonal improvement in employment and an increase in both the volume and unit value of exports, the evidence seems to show that the tide of business has turned and that its flow will quickly spread to those parched areas which have not yet felt the improvement. The increase in activity of business, together with the influence of the much greater improvement in the United States, has tended to generate an optimism, which of itself helps to produce further improvement.

"In its early stages business improvement shows itself in rather isolated bits of intangible information. It is not until the movement is well under way that general statistics reflect this improvement, which by that time will have made itself felt in the plans and policies of a great many companies."

Since this was written, further comparative figures support the contention that the business upturn continues to be definitely maintained.

### Farm Tractor With Air Balloon Tires Makes New Record

Enthusiasm of the farmers for pneumatic-tired tractors is making tractor manufacturers seek higher speeds to make the tractor more valuable for hauling or travel, and for use as an all-purpose farm machine. The most interesting speed performance is the recent official A.A.A. record of 35.4 m.p.h. for 5 miles, made by a tractor at the Wisconsin State Fair Grounds A.A.A. race.

Thousands of people watched A. Schroeder, prominent Wisconsin farmer, using a new standard farm tractor equipped with the new Firestone Low Pressure Tractor Tire plow several rows of the hard uneven ground inside the race track oval. Mr. Schroeder then unhitched the plow and turned the tractor over to Frank Brisko, famous race driver, who was one of the leaders in the Indianapolis race this year. The crowds were amazed to see the tractor streak down the straight stretches, at times travelling 40 miles an hour.

A new four-speed transmission development, combined with the pneumatic low-pressure tire development made possible this unheard-of speed.

At the end of the run, Frank

Brisko, when asked how he liked the ride, said, "It was just like driving a passenger automobile."

The new highway speed and comfort now available in farm tractors shows how completely the tractor, with these big tires, serves as an all-purpose machine. Demonstrations in all parts of the country have proved to farmers that tractors using these tires give greater fuel economy in farm operations, greater traction, do not pack seedbeds, make the farmer's work easier, and save time as well as money.

### Dates to be Remembered.

Following is a list of the field days at the Dominion Experimental Sta., Lacombe, Alberta:

August 11th—Clydesdale Breeders' Field Day.

August 14th—Cereal Crops Field Day, and the Annual Meeting of the Alberta Branch Canadian Seed Growers' Association.

August 15th—Cereal Crops Field Day, and the inspection of Searle Grain Co's plots.

August 17th—General Field Day for Soldier Settlers. A general program is being prepared covering the most important features of experimental work, and that which will be of most service to soldier settlers.

### No Guarantee On Binder Twine This Year.

"The provincial government has no intention of entering the binder twine business at present," declared Premier Brownlee when asked just recently. "I have said that if the government continues giving guarantees, so as to take the risk, we would take over the whole thing as a monopoly. But our present intention is to get out of the guarantee-giving business."

# REPLACE WORN TRUCK TIRES

NOW, before the hauling season starts in earnest, put on new Firestone tires and be sure that there will be no costly delays from tire trouble.

Firestone Truck Tires have everything to lower hauling costs and give increased mileage. Gum-Dipped cords eliminate danger from blowouts. Two Extra Cord Plies under the Tread make the tire stronger and safer, while the Non-Skid Tread grips the road at all times. These extra values give you 25 to 40% longer tire life at no extra cost.

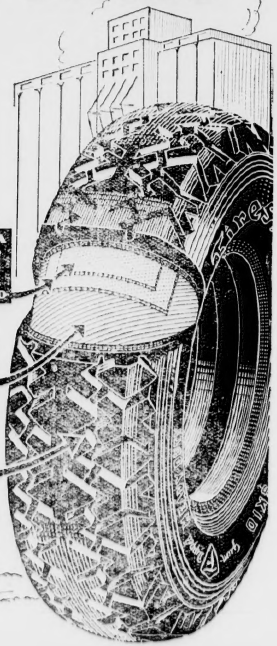

Have your nearest Firestone dealer put on a set of Firestones before the rush starts. He has a complete stock and gives quick service. See him today.

**Westcott Notes.**

Mrs. W. H. Ellis and daughter Beth, of Arrowwood, have been visiting for a few days at the home of Mr. and Mrs. M. Jacobsen.

Wednesday evening, July 26th, the last softball game of the season was played on Robertson's ball diamond. As a visiting team that was expected from Didsbury did not appear on the scene, two teams of local players put up a game that was quite interesting to both players and spectators.

About sixty people gathered at the Corralls at the M. Jacobsen place Monday evening, July 24th—some to watch, others to take part in the steer-riding there. Many of the boys made good rides, but a few "hit the dirt" rather hard, though no one was seriously injured. Much interest was added to the program when Mr. Novakaus arrived with a tricky little Shetland pony that proved very hard to ride.

A number of the Westcott steer-riders went to Bottrel Stampede last Wednesday, but to their disappointment there was no steer-riding listed on the program. However, after the wild cow-milking contest was over, the Westcott riders and a few others did some exhibition riding on several of the wild cows. The Westcott Clown created a great deal of merriment with his acting and costume, also with some exhibition roping, in which he used quite a number of ropes.

**Mountain View Notes**

Many members of the local W.L. attended the district conference held at Carstairs on Wednesday last. Sixty-five ladies were present from the different branches. A splendid lunch was provided by the Catholic Ladies of the village. Mrs. Hoesgood was re-elected as Constituency Convenor.

The recent rain was welcomed by the farmers of the district.

**WEEKLY SERMONETTE**

"What a splendid thing it would be if people who lose their tempers wouldn't be able to find them again."

**WEEKLY JOKE**

The solemn-looking man said to his friend, "I hope you are not unmindful of the fact that we all have a duty to perform, we must combat the unrest which exists in the world."  
"I'm doing my best," said the other.  
"How?"  
"I manufacture mattresses."

**Lacombe Had  
Hot Times In  
Past Seasons**

July 28th—The past few days have been so warm that ye Bulletin correspondent figured out that there must be many heat records go by the board, so he had the Dominion Experimental Station here draw up a list of the hottest days, and some of the figures surprised him—here is one little known fact—the average high temperature for July during the past 25 years was found to be 88.62.

Temperatures of over 90 degrees in the shade were found at some time in every year, excepting 1927 and 1931, with July 1924 showing more extremely hot days than in any one year, July 2nd being the hottest, with a high of 103.8. The 1st of July the same year was 98.5 and July 5th was 98. July 9th, 14th and 15th all showed temperatures over 90 in the shade.

July 1925 has 5 days over the 90 degree mark; 1926 had 3 days of 92 to 94 temperatures; 1929 had three over 92; 1930 had two over 90 and 1932 two over 90, these being on August 7th and September 6th.

Wednesday's (July 26th) temperature of 98 degrees was only beaten twice—July 1st, 1924 and July 2nd, 1924, though July 1st only had a one-half degree advantage, and July 2nd had 100.8. July 14th, 1930 with 97 degrees was a close runner-up and August 28th, 1929 tied today's mark.—Edmonton Bulletin.

### WORLD HAPPENINGS BRIEFLY TOLD

The Canada-South Africa trade agreement, negotiated during the imperial economic conference in Ottawa, last summer, has become effective.

The world disarmament conference has been adjourned to Oct. 10 despite a protest by Rudolph Naeffgen, Chancellor Hitler's representative, that the long recess amounted to a first-class funeral for disarmament.

Approximately 2,500 single unemployed men are in Vancouver receiving no assistance from either city or province because of their refusal to go to relief camps or because they left these establishments.

E. L. Bushnell, director of radio station CKNG, Toronto, has been engaged by the Canadian radio broadcasting commission to make a tour of the western provinces to organize programmes from this area.

Detention for 28 days was the sentence meted out to Guardsman Harris, sentry at Windsor Castle, following a court martial. Harris was found asleep at his post while the royal family were in residence some time ago.

A plan for an even greater measure of co-operation between all nations in the fight against tuberculosis was made by Professor S. Lyle Cummins, of England, noted authority on the disease, at the annual dinner of the National Tuberculosis Association held in Toronto.

Dr. John M. Chapman, associate professor of banking at Columbia University, in an address before the round table on money, banking and financial situation, at the institute of public affairs, said that the United States "bank failure movement is not ended."

Seven speedy destroyers used by the United States coastguard for years to chase rum runners and other smugglers operating off the Atlantic coast have been returned to the navy because the government's economy programme necessitated a reduction in expenditures.

### Has His Own Method

English General Taught Himself Eight Or Nine Languages

Lieutenant-General Sir Edmund Ironside has exchanged what was practically a snore at the Tower of London, England, for an active part by his new appointment as Quartermaster-General of the Forces in India. As the youngest general officer in the British Army for many years, still less than fifty-four years old, he will now have an opportunity to use his keenness to the full. He taught himself the eight or nine tongues he knows by a method of his own, memorizing every day a score of nouns and adjectives. Verbs come in their own good time, and if he is ever at a loss for one, he bridges the gap by an eloquent gesture and carries on calmly with the nouns.

### Canadian Authors Tour Britain

Party of Fifty Will Visit Literary Centres Of The British Isles

Following the annual convention of the Canadian Authors' Association which this year was held in Quebec City, a party of about 50 Canadian authors and their friends sailed July 1st on the "Empress of Britain" for a tour of the literary centres in the British Isles. They will be met by some of the most distinguished authors of Great Britain and will experience the advantages of personal contacts with the scenes depicted in English literature including the country of Hardy's "Tess"; the spot where Keats wrote "Ode to the Nightingale"; Westminster Abbey, Dr. Johnson's house, the inn made famous by Sam Weller, Stratford-on-Avon, Kenilworth Castle, Wordsworth's home, the Robert Burns' country, and other centres of literary interest.

Among those who, it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Galsworthy, Sir Henry Newbolt, J. B. Priestley, John Drinkwater, and George Bernard Shaw. There will also be recognition by leading public bodies and parliamentarians.

The Canadian Authors' Association was organized in 1921 with a view to promoting the interests and craftsmanship of Canadian authors. It has branches from coast to coast and a membership of about 800. The association has helped to disclose the very substantial contribution which Canadian writers are making to current literature—a contribution which had to some extent escaped observation due to the fact that a large part of Canada's literary production finds its way to the public through the channels offered by publishing houses in the British Isles and the United States, with the result that numbers of well-known Canadian writers were commonly regarded as being Englishmen or Americans. During the 12 years since the association was organized great advances have been made in the Canadian publishing industry, particularly in the field of magazines and literary periodicals.

### Great Masonic Gathering

Duke Of Connaught Opens New Headquarters In London

At one of the greatest Masonic gatherings which has been held in London, England, for many years, the Duke of Connaught, Grand Master, opened the new Masonic headquarters adjoining the old headquarters in Great Queen Street. The lofty tower of the new building rises above the not inconsiderable buildings of the neighboring Kingsway. There is a great inner temple surrounded by 15 lodge rooms, a large museum and library and extensive administrative offices. The cost which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

### Faith In Western Canada

Wrigley Company Breaks Even On Wheat Deal

Wheat taken by the William Wrigley, Jr., Company of Canada in payment of debts owing them in western Canada has now been sold without financial loss states Allan Ross, president of the company.

In December, 1930, the company announced all money owing it in the prairie provinces would be used to purchase 1,000,000 bushels of wheat. The announced intention was to leave the money in western Canada in wheat and the company's announcement declares its faith in Canada and her chief commodity had been more than justified.

By Ruth Rogers

YOUR NEW HOUSE WITH THOSE SMART FULL SLEEVES AND BECOMING TAILORED NECK

Here's a charming new model which has lots of good style about it. Yet you can see it is becoming, so simple to fashion, yet every detail conforms to the dictates of the mode. While crinkly crepe silk made the original.

It is also lovely in grey, maize, light blue or eggshell. Style No. 701 is designed in sizes 14, 16, 18, 20 years, 26, 38 and 40 inches bust.

Size 16 requires 2½ yards of 39-inch material. Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coupon carefully.

### Fruit Popular In Canada

Consumption Of Apples, Oranges and Bananas Is Heavy

Notwithstanding the fact that the people of Canada eat more eggs and butter than the people of any other country and register high as meat eaters, they also enjoy fruit. The statisticians of the Canadian Government have just released the figures on fruit consumption in Canada for the fiscal year ended March 31, 1933, which show that the domestic consumption of apples was 2,272,100 barrels, of oranges 2,883,471 boxes, and 3,325,900 stems of bananas. On the basis of the population of 16,506,000 the average per capita consumption was about one-fifth of a barrel of apples, more than one-quarter of a box of oranges, and less than one-third of a stem of bananas.

The total domestic consumption of the commercial apple crop grown in Canada has been fairly consistent during the past ten years, varying in somewhat the same manner as commercial production, whereas imports show a gradual decrease which has been more rapid during the last two years. Bananas show a steady increase in imports, but with a drop during the 1932-33 season to about the 1927-28 level, although the population has increased at a greater rate and during the last three years consumption per capita has declined. Imports of oranges vary from year to year and show no decided trend to decrease or increase, which trend is also lacking in the consumption per capita.

### Serum For Melancholia

Biologist Has New Method Of Treating Mental Diseases

Melancholia and even certain forms of bad temper can be cured, it is claimed, by a new serum discovered by the Vienna biologist, Professor W. Hausmann, according to a recent publication of the psychiatric clinic of the Vienna University.

Professor Hausmann has found in the red blood corpuscles a substance unusually sensitive to the influence of light. In view of the fact that light has a very definite vitalizing effect on the body and mind, Dr. Hausmann and other scientists decided to make this a new method of treatment for mental diseases.

After successful experiments on animals, tests were made on patients of the psychiatric clinic, which proved to be most encouraging. In the majority of cases a considerable improvement of the mental trouble was noticed after the patients were given a number of injections with the serum extracted from the red blood corpuscles of the blood. Melancholic moods became less frequent and less depressing, and the appetite and activity of the patients increased.

According to observations at the psychiatric clinic, the effect of the new treatment was increased by the application of ultra-violet rays. In several cases of profound melancholy positive and lasting results were obtained, it was claimed.

### Piracy In China

White Men Now Prey Upon Chinese Reversing Procedure

One of the most amusing cases of piracy in the China seas in many years—the usual rules reversed, with white preying on Chinese—had been disclosed with the capture in a Dairen port of three Germans.

Japanese police say the leader confessed in the Dairen jail that the trio and two others captured later in the hills, seized the "Shenguan," a 2,000-ton Chinese steamer, and slew four Chinese including a woman, and seven Chinese who were on board. The leader, a Prussian by the name of Taudin and his two confederates were captured after the "Shenguan" ran aground in the darkness near Port Arthur.

### Had Cause For Complaint

Rev. Paul Hardin, Jr., of Concord, North Carolina, says he is going to insist that when he makes an address there shall be no singing. At the conclusion of a sermon the male quartet sang "How Tedious and Tasteless." Two days after he delivered a baccalaureate sermon at a high school, and right after the glee club sang "Awake! Awake!" Although not having heard Mr. Hardin speak we think he has cause for complaint.

## To Measure Wind Resistance

Seven Hundred Miles-An-Hour Tunnel Built At English Laboratory

Important improvements in the range and accuracy of shell and rifle fire will result, it is hoped, from a new 700 miles-an-hour wind tunnel, which is to be constructed at the National Physical Laboratory, Teddington, England.

The tunnel will provide the fastest stream of air which has yet been produced—with a velocity nearly equal to that at which sound travels through air. This will render it possible for the first time for wind resistances to be measured at speeds closely approximating to the highest muzzle velocities obtainable.

As a result research workers will be able to obtain exact data on the relative merits of projectiles constructed with various modifications to existing standard shapes. Instead of elaborate and costly gunfire trials with projectiles the whole work will be performed in the laboratory. The air will rush past the shell instead of the shell rushing through the air.

The chief directions in which improvement may be expected are in increased range in the case of shellfire, and greater resistance to "drift" due to sideways wind, in the case of rifle-fire. In the latter case it will be possible to reproduce the full effect of lateral wind of any desired strength by placing the bullet to be tested at a small angle to the 700-miles-an-hour gale.

The importance of such practical tests lies in the fact that hitherto it has proved impossible to make precise calculations of air resistance based on theory alone. With both ships and aircraft it has been found that important improvements can be obtained by apparently insignificant changes in design.

In the method which will be adopted, the projectile will be suspended in the wind tunnel by an apparatus which will automatically record the various forces exerted on the projectile. This record can be transmitted by electrical means to an observer outside, who has as full a knowledge of everything that is happening to the projectile as if he were in the tunnel.

The new tunnel is to be constructed, in order to make use of the enormous air pressure developed in the laboratory's compressed air tunnel for aircraft testing, which is ready to begin work.

When testing in this tunnel is completed, the air it contains, which exerts a pressure of 5,000 tons on the giant casing at either end, will be released through the new projectile tunnel. It is estimated that the blast of air will last for about twenty minutes at the full speed. In addition to projectile tests the tunnel will be used to measure the forces on the tops of aeroplane propellers, from which other improvements are expected.

The creation of the compressed air tunnel, which alone makes the projectile tunnel a possibility, is a major triumph for the British steel industry. Its components are so large that it was necessary to build the containing building round it. The whole has been tested up to the record pressure of 550 pounds a square inch—more than forty-five times the normal pressure of the atmosphere.

### Taking Wonderful Trip

Party Of Ten Hawaiian Boys On Way To Yukon

When R.H.H. Menow docked in Vancouver, it was just the end of another journey for most of the passengers, but for 19 boys from Hawaiian Islands, it was arrival at the stepping-off place for magnificent adventures.

They are members of a party from Honolulu school, under direction of Mr. Bayne Beauchamp, and their destination is Yukon and Alaska, where they will do nothing at all except—

Travel 1,600 miles on the Yukon river in small boats; prospect for gold; botanize; take samples of plankton (minute fish food); take moving pictures. They have arranged for some boats at Whitehorse, and will build others.

The boys, ranging in age from 14 to 17, were picked for their physical and mental ability. They will visit Dawson, Fort Yukon and Tanana on their trip down the Yukon.

## Harvest is Approaching! Have You Checked Over Your Binder?

—To see what new REEL SLATS and ARMS you need.

### Burnside Notes.

Mr. Geo. Metz, son Fred, and Howard Dedels spent Tuesday in Calgary.

Mrs. Blakely, of Melfort, Sask., is visiting her cousin, Mrs. H. McLean.

We are sorry to hear that Mrs. E. R. McMillster is very ill in the Didsbury Hospital.

Mr. Bob Springgay spent several days this week with Mr. and Mrs. N. Eckel and other friends.

Mr. and Mrs. Hugh McLean and daughters spent Sunday with Innisfail friends.

Mrs. Pete Schumaker is spending this week in Olds taking in the farm women's short course, as delegate from Lone Pine W.I.

Mr. and Mrs. D. Gallagher and daughters, of Beiseker, spent Thursday with Mr. and Mrs. A. E. Thompson.

Mr. Jim Tait has returned from his farm near Oyen and reports that crops in that district are almost a total failure.

Mr. Lewis McCulloch went to Calgary on Tuesday. His hand is healing nicely after the accident at Turner Valley, in which he lost the little finger of his left hand.

Miss Grace Campbell, who has been spending her vacation at her home here, has returned to her position at Three Hills.

Mesdames Woods, Jenkins, Press and Eckel attended the W.I. conference at Carstairs last week. Mrs. Hosgood was re-elected constituency convener, with Mrs. N. Eckel as assistant.

Lone Pine W.I. met at Mrs. C. R. Liesemer's on Thursday last, with an attendance of over forty. Mrs. Eckel was elected secretary for the remainder of 1933. It was decided to contribute \$10.00 towards the Hall insurance. Six dozen spoons were bought for use in the Hall. As this was the week of Mr. and Mrs. Liesemer's silver wedding anniversary, the W.I. presented them with a case of silver. The next meeting will be held at the home of Mrs. N. Eckel, when Mrs. Lyons will give a paper on "The Creed."

## Drumheller Nationals Prove Too Much For the Canaries

Drumheller Nationals proved to be too much for the local Canaries in the provincial junior softball playoffs. After losing the first game at Drumheller 5-1, the locals took it on the chin to the tune of 12-4 at Didsbury last Thursday afternoon, thereby losing the series by 13 runs.

The Nationals played good ball throughout and deserved the win. Errors by Didsbury were the main reason for the big score, and with more practice and experience the locals would provide a much better game. Holub pitched a fine game and deserved better breaks. Harold Gulliver played a fine game in centre field and his brother Bob turned in a good performance at first base. Krebs also played snappy ball.

The Nationals displayed real class in the evening by beating an all-star local aggregation 4-2. This game provided plenty of snappy ball and good pitching, with Searle on the mound for the locals. Cook, Wynan, Woodlock and Gooder bolstered the junior team and supplied sufficient strength to make the Nationals forget their best ball for a win.

Drumheller displayed a fine array of ball players, with good fielding ability and plenty of power on the attack. They should give a good account of themselves during the balance of the playoffs.

### Calf Club Meeting.

A very successful meeting of the calf club was held Tuesday afternoon with practically 100 per cent. of the members, and with W. J. Elliott, club director, present. Most of the boys and girls live east of the railroad and these came by truck.

The first class was held at Mr. Norman Clarke's, where several classes of Jerseys were judged. These consisted of yearling heifers and calves.

The club then went to the farm of Mr. Morton, where an hour was spent with his good herd of Ayrshires. These were in the pasture, but it afforded a good opportunity to see all the stock, and the class learned what the Ayrshire type was, as well as something about the breed.

The next stop was with Mr. H. Stevens' Guernsey herd. Mr. Stevens has a number of well graded-up Guernseys and the beginning of a good herd. Several classes were judged by the boys and girls. After an hour spent with the stock, Mrs. Stevens called a halt for refreshments and after three hours of class work the club very willingly agreed to the interruption and all expressed their thanks to Mr. and Mrs. Stevens for their kindness.

There will likely be another meeting of the club early in September, and notice regarding this will be sent out later.

It is expected that the club show of calves will take place the latter part of September. Most of the members are putting forth a real effort to have their calves properly trained and in good shape for the show.

### Melvin Notes

Mr. E. McComb, of Calgary, was a Monday visitor with Mr. C. Young.

Mr. and Mrs. A. F. Cowitz spent Sunday with Mr. and Mrs. A. Krebs.

Mrs. G. Carlson and Gladys are spending the week with High River friends.

Mr. and Mrs. Lloyd Chandler and family spent Sunday with Mr. and Mrs. Lawrence Chandler.

Mr. and Mrs. Pemberton, Harold and Maurine, of Calgary, spent Sunday with Mr. and Mrs. C. Young.

Mr. and Mrs. Ed. Vetter, of Three Hills, spent Sunday with Mrs. Vetter's parents, Mr. and Mrs. Peter Johnston.

Mrs. C. Young and Dorothy attended the dinner Tuesday evening given by the Super-Health Aluminum Co. at Mr. and Mrs. J. R. Stevens.

### LOCAL & GENERAL

Mr. and Mrs. J. H. Lowrie, who have been camping in the Bergen district, returned home last weekend.

Mr. Alfred S. Hamill and Miss Annie C. McKee, both of Calgary, were married at the Manse on August by Rev. A. J. Mitchell.

We understand that Mr. Roy Kendrick, who has been taking treatment at Calgary, expects to be able to return home this week.

Retain your tickets for Berscht's Blanket dated July 29! They will be good on August 12th.

Mr. and Mrs. C. Mortimer and family, who were vacationing west of Edmonton for the past two weeks returned home Sunday.

Mr. and Mrs. Harvey Hosgood returned from their honeymoon last weekend and have taken up their residence on their farm west of town.

Mr. and Mrs. J. Dodge and family, Mr. J. Harper, of Spirit River, and Mrs. Van Slick, of Red Deer, were visitors at the Manse on Monday.

Dress Sale—Twelve Voile and Rayon Dresses To Clear at \$1.50 to \$2.50. Values to \$4.50 in the lot!—Mrs. Wilson, Main St.

Messrs C. E. Reiber and T. Johnson expect to leave this week for a motor and fishing trip to B.C. They will visit Rossland, Trail, Vernon and other points.

Mr. Cliff Bellamy, son Raymond and Mr. Walter Bellamy left Friday for Salmon Arm, B.C. to visit their father, Mr. John Bellamy, who is seriously ill.

Little Raymond Falkorth, who is under the care of the child specialist, Dr. Coyle, is receiving treatment for his hip in Calgary. It is hoped he will be home in a few days.

The subject of the sermon at Zion Evangelical Church next Sunday morning will be, "Good Soldiers of Jesus Christ," and in the evening, "A Father's Love."

The annual meeting of the local W.C.T.U. will be held at the home of Mrs. Brubacher on Thursday, August 10th at 3 p.m. Reports from all departments will be given, and a good attendance is expected.

Piano Tuning De Luxe! Gavin Spence and W. H. Norton, official tuners for the Toronto Conservatory of Music Examinations, and the Alberta and Saskatchewan Musical Festivals, will be in Didsbury on or about August 7th. Leave orders at Pioneer Office.

### W.I. Conference.

The annual constituency conference of the West Didsbury Women's Institutes met at the Carstairs United Church on July 26, with 72 ladies present from Carstairs, Cremona, Lone Pine, Mountain View, Rugby, Siebertville and Westcott. The constituency convener, Mrs. James Hosgood presided and with her on the platform was the constituency secretary, Mrs. J. H. Robertson and the district director, Mrs. Ullman.

Mrs. Hosgood briefly addressed the gathering and introduced the recently appointed director, Mrs. Ullman.

Mrs. Yule, Carstairs, in a bright little speech very cordially welcomed all, and Mrs. Eckel, Lone Pine, in her usual happy manner replied on behalf of the visitors.

The morning session was taken up mostly with the financial statements from the different branches, all being very satisfactory.

At the noon hour the Catholic Women's League served a bountiful luncheon in the United Church hall.

At the afternoon session an inspiring address was given by Mrs. Ullman on "Our Institute" in which she pointed out that to have a successful institute each member should do her part, and that efficiency is only gained by work.

The reports by conveners of standing committees showed that much helpful work had been accomplished and that typical western optimism pervades them.

A few items of business were dealt with, and pleasantly interspersed throughout the program were readings and vocal selections.

The officers elected were: Convener Mrs. J. Hosgood; Assistant

## MEN'S High Top Boots
